# ScripTouch Remote

*Rugged Reliability  
Industry Best Service  
Software Excellence*

remote

**Creates a virtual channel from the client to the server for  
USB communication with a Scriptel signature pad**

ScripTouch Remote is used with Citrix and RDP-based (e.g. Terminal Services) systems to create a virtual channel from the client to the server for USB communication with the Scriptel signature pad. It is robust and simple to install.

Even in cases where the system supports USB forwarding natively (such as with Citrix XenDesktop 7.5 and above), administrators may appreciate the additional ease of managing Scriptel signature pad connections that is available by using ScripTouch Remote.

ScripTouch Remote is free to download within our ScripTouch Sign and Save software suite but is not activated. It is free to activate for a 30 day trial period. Thereafter, a license must be purchased for each Scriptel signature pad. Licenses are allocated to registered users and activation is a simple online process.

**Scriptel is currently offering a 90-day free trial of  
ST Remote on our customer portal. (See link for details)**

All ScripTouch signature pads are verified "Citrix Ready," ensuring compatibility with Citrix XenApp and XenDesktop!
